Bachelor of Arts in
Interdisciplinary Studies: With a focus on Health and Human Services

The Bachelor of Arts in Interdisciplinary Studies: With a focus on Health and Human Services is a degree completion program specifically designed for the adult learner seeking an accelerated, non-traditional pathway. This program provides students with a broad based interdisciplinary education focusing on individuals who seek a career in a wide variety of professional settings in healthcare, human services, social services, and related fields. Students graduating with a degree in Interdisciplinary Studies will demonstrate advanced skills in critical thinking, research, writing, and oral presentation. Graduates will be able to apply interdisciplinary methods, approaches, and insights to the analysis of a given theme or issue, and to the development of creative solutions to complex problems.

The Interdisciplinary Studies: With a focus on Health and Human Services program is designed for those with work experience and an Associate’s Degree (45 – 75 transfer credits). The program is a cohort model for the adult learner who is managing work and family demands. In completing this degree, students will be prepared to advance their careers in a wide range of occupations and industries and to proceed to graduate-level studies.

Updated 10.9.18
Course Descriptions:

IDST 299  Learning in Context
Provides a foundational introduction to adult learning as a context for students entering college. Both theory and practice are part examining the skills, knowledge, and attitudes needed to both succeed as a learner and transfer that new knowledge into the world. Group dynamics, individual learning styles, collaborative learning, and reflective inquiry are all part of this interactive course.

ISDT 360  Cross Cultural Perspectives in Health Care
Provides a cross-cultural perspective on population health and health care in order to understand a complexity of structures, processes, and factors that shape a phenomenon of healthcare in the United States and other countries.

POSC 340  Inequality and Social Policy
Examines social welfare policies and programs from the New Deal to the present analyzing their economic, cultural, historic and political roots. Emphasis on selected issues such as poverty and inequality, healthcare, abuse and neglect, daycare and parental leave. Examines social welfare policies as expressions of American values and political processes and compares American programs to those of other industrialized countries. Special attention paid to the experience of social program recipients.

IDST 360  Health and Wellness in an Aging Society
Provides an overview of issues related to health and aging at the personal and societal levels. Discusses myths and stereotypes of aging and the concept of successful aging. Examines life expectancy, chronic disease, and their impact on an aging society.

BIOL 195  Nutrition for Healthy Living
Introduces students to the importance of diet for present and future good health. Examines the importance of carbohydrates, fats, proteins, vitamins and minerals, and their interactions. In addition, the course explores topics such as label-reading, diets, dietary analysis and other issues of current interest.

PSYC 355  Human Sexuality
Examines the field of human sexuality from psychological, biological and sociological perspectives. In covering a wide range of contemporary topics, emphasis is on empirical, verifiable scientific information.

ENGL 395  Experiential Credit Portfolio Preparation and Writing
Provides students with help in completing a portfolio for experiential credit. Includes a rigorous essay-writing component.

Updated 10.9.18
Course Descriptions (continued):

PSYC 332  Drugs and Human Behavior  
Examines the use and abuse of drugs from biological, psychological and cultural points of view. Addresses contemporary efforts in education, prevention and treatment of abuse.

PSYC 495  Issues in Mental Health  
This course will explore issues in mental health with an emphasis on prevention and treatment. A variety of categories of mental illness will be discussed, as well as, ways to foster mental wellness. Interventions for assisting individuals and families with mental health concerns and available community resources will also be included in the course content.

SOWK 443  Casework with Couples and Families  
Explores clinical practice with family problems. Examines the ways in which environmental, social, economic, psychological and institutional pressures help create and exacerbate family dysfunction, and the integration of this understanding into skilled intervention and families.

CCAP 300  Tier III Capstone Seminar  
Challenges students to integrate knowledge from several disciplines, applying academic learning and critical thinking skills to modern-day issues. Encourages students to work with others and become engaged citizens in the context of today's world.

PHIL 385  Medical Ethics  
Challenges students to understand, construct, and criticize both informal (natural language) and formal (categorical and propositional) arguments. The course considers in detail the very notion of argument, argument structure, and the criteria for constructing cogent arguments, and distinguishes arguments supported by evidence and reason from mere opinion and belief. Students will learn to apply these logical concepts in their writing, conversing, and reading.

SOCI 331  Methods of Social Research  
Examines sociological methods commonly used in the study of the social world, as well as ethical and political issues related to the research process. Explores the various steps of research design, data collection (questionnaire construction, interviewing, and observation content analysis) and data analysis.

IDST 350  Management & Administration in Health Care  
*This course currently in development will explore complex and controversial topics in culture and society in regards to the management and administration of health care from the vantage point of multiple disciplines.*

IDST 401  Senior Seminar  
Available to senior interdisciplinary studies majors, this seminar requires students to carry out supervised research projects within their areas of study and to share the progress and results of their research with seminar participants.
