TEACHING LICENSURE

Students majoring in chemistry may opt to pursue initial teacher licensure as an early childhood teacher or elementary teacher. Also, Chemistry majors may pursue initial licensure as a teacher of chemistry for the middle school or secondary levels. Students seeking any of these licensures must complete a chemistry major, education major and a licensure program in education.

COURSE DESCRIPTIONS

CHEM 150 Introduction to Chemistry I 4 cr

Studies chemical principles, theories, laws and their applications. Topics include electronic and nuclear behavior, periodicity, stoichiometry, structure and bonding. Teaches laboratory techniques through the performance of experiments related to the above topics. Required laboratory. Course attributes: CSTL, ENVI.

Prerequisite: None

CHEM 152 Introduction to Chemistry II 4 cr

Studies chemical principles, theories, laws and their applications. Topics include oxidation and reduction, kinetics, thermodynamics, equilibrium and descriptive inorganic chemistry. Teaches laboratory techniques through the performance of experiments related to the above topics. Required laboratory. Course attributes: CSTL, ENVI.

Prerequisite: CHEM 150

CHEM 201 Organic Chemistry I 4 cr

Studies the structure, properties and synthesis of organic compound and the mechanisms of their reactions. Topics include bonding, molecular orbitals, stereochemistry, resonance, acid-based chemistry, nomenclature, infrared spectroscopy, conformational analysis and substitution and elimination reactions. Required laboratory.

Prerequisite: CHEM 152

CHEM 202 Organic Chemistry II 4 cr

Builds on the concepts introduced in CHEM 201 by studying the reactivity of other classes of compounds including aromatic, unsaturated, alcohols, ethers, carbonyl derivatives and nitrogen-containing compounds. Nuclear magnetic resonance (NMR) will be studied. Basic total synthesis will be covered

CHEM 410 Instrumental Methods in Chemistry 3 cr

Explores the role of instruments in chemical research. The theory and hands-on experience of a variety of analytical instruments will be covered. These include: ultraviolet, visible, fluorescence and infrared spectroscopic instrumentation as well as high pressure liquid chromatography (HPLC) and gas chromatography (GC). This course is laboratory-based with minimal lecture.

Prerequisite: CHEM 310

CHEM 420 Special Topics in Chemistry 1 to 4 cr

Covers current topics in chemistry including: bioinorganic chemistry, bioorganic chemistry, forensic chemistry and physical chemistry. Depending on the topic, laboratory exercises could be conducted as part of the course content. This course requires an independent project.

Prerequisite: Junior/senior status or department approval

CHEM 440 Advanced Organic Chemistry 3 cr

Provides the student with a deeper understanding of some of the concepts and reactions that are discussed in CHEM 201 and CHEM 202. The course also introduces new reactions such as the Aldol, Claisen Rearrangement and Ene reactions. The role of these reactions in the total synthesis of natural products is also explored. Current topics in organic chemistry will be discussed.

Prerequisite: CHEM 202

CHEM 490 Chemistry Seminar 1 cr

Presents current topics in chemistry. Primary literature articles will be assigned and discussed in class. Enrolled students will present topics of their choice. Attendance at academic lectures at other colleges/universities is possible.

Prerequisite: Senior status

CHEM 500 Independent Study in Chemistry 1 to 3 cr

For chemistry majors who wish to conduct an independent project on a specific topic in chemistry. The project will be supervised by a faculty member. The course requires a final scholarly report detailing the finding of the project. This course may be taken more than once for lengthy projects.

Prerequisite: Junior/senior status, department approval

CHEM 540 Internship in Chemistry 1 to 15 cr

Offers the upper-level chemistry major an opportunity to practice chemistry in an appropriate professional situation. The student will work with a faculty sponsor and an off-campus supervisor in gaining experience significant to the major.

Prerequisite: Junior/senior status, department approval
