Sprague Electric Family Day Attended By 2500

Military Demands Force Discontinuance of Company Battery Department

As of August 27, 1951, it was found advisable to discontinue the manufacture and sale of mercury hearing aid batteries. This action was necessary in order that the Company could better meet military demands for the production of capacitors and resistors. With the discontinuation of the Battery Division, Sprague Electric can devote more of its production and engineering forces to the manufacture of its primary products and will be in a better position to satisfy the increased demands of the stepped-up rearmament program.

The Blood Which You Give May Help YOU Live

So be sure to sign up when Bill Stackpole, Chairman of the Blood Donor Committee, approaches you to make an appointment for a blood donation. The Bloodmobile will be in North Adams at the Masonic Temple from September 24 through September 29. The Sprague Electric Company allows one hour and a half to its employees who donate blood during working hours.

Some of the blood which you give will go to the local hospitals; some will go to Korea where the need is greater than ever. Thus by giving some of your blood, a painless process, you will be helping your friends and neighbors, and possibly yourself, as well as contributing to saving lives in Korea.

North Adams in both 1949 and 1950 broke national records by its generous contributions. Let's do it again!

Clarence Chaffee Winner In Doubles

Clarence Chaffee and his partner, Stuart Robinson, of the Williams Tennis Team, won the Western Massachusetts Doubles Championship, 6-2, 6-3, 6-4. The tournament was held over the Labor Day weekend at the Pittsfield Country Club.

Mr. Chaffee was a member of the Employee Relations Department for the summer.

Fishing Contest Ends On October 6

October 6 will be the deadline for the 1951 Fishing Contest. No entries will be accepted after that date. This leaves the fishing enthusiasts two more weeks during which to enter their catch.

The classes of fish which are eligible are Trout (brook or native, brown and rainbow), Bass (large mouth, small mouth), Pickerel, Northern Pike, Perch, Bullhead, Walleye Pike, and Lake Trout.

If you wish to enter your fish, take it to Fred Powers at Brown Street, Bob Boyer at Marshall Street, or George Lallombard at Beaver.

The winners of the contest will be announced in the October 19 issue of the LOG.

Below: Representatives of the ICW No. 2 present George Theberge with a check for $100 by the ICW No. 2 in appreciation of his service. From left to right: Bill Stackpole, Chairman of the Blood Donor Committee; Capt. Glenn R. Blackledge, Sgt. First Class Robert Hickman; and Pfc. Thomas Decker demonstrated the use of military equipment.

Below: Harry Haskins, Supervisor on the Bathtub Assembly Night Shift, shows his family where he works.

George Theberge Retires

Former Watchman at Beaver Street Plant. Served Twenty Years With Company

George Theberge, former watchman at the front door of the Beaver Street plant, has retired after over twenty years of service with the Sprague Electric Company. Mr. Theberge, who celebrated his seventeenth birthday last March, also served as a watchman for the tire fabric manufacturing plant which occupied the Beaver Street location before it was taken over by Sprague Electric. In addition to being a watchman, he ran the elevator for a number of years.

Mr. Theberge was presented with a check for $100 by the ICW No. 2 in appreciation of his service.

Below: George Theberge accepts his check from Bill Stackpole. Stackpole, Mr. Theberge's employer, praised his work ethic and dedication to the company.

The Sprague Electric Family Day which was held on Saturday, September 15, in the morning, from 9 to 12 o'clock, attracted over 2500 people to the Sprague Electric Family Day. All of these programs were under Mr. Chaffee’s direction.

Clarence Chaffee of the Employee Relations Department made the arrangements for Family Day. The first Family Day was held on September 17, 1949, and last year, the school teachers and industrial leaders in the area were invited to participate in a B-I-E Day. All of these programs were under Mr. Chaffee’s direction.

Below: Harry Haskins, Supervisor on the Bathtub Assembly Night Shift, shows his family where he works.
We Think Your Baby Is Cute, Too

But because so many children's pictures are sent in to be published in the LOG, it may be some time after a picture is received before it appears. So please try to be patient with us. We can appreciate the fact that you are anxious to have Junior's picture in the LOG, but we must say that we cannot give a definite date for the publication of your picture.

Because of the process involved in preparing snapshots of children for the LOG, it will no longer be possible to return pictures to their owners. With that in mind, it would be best to send in snapshots which can be replaced.

Chemist Attends Jubilee Session

Vincent J. Barry, a member of the Government Contract Department, recently attended a five-day meeting of the American Chemical Society in New York. This session was attended by 18,000 chemists and chemical engineers from 43 different countries and was part of a two-week diamond jubilee convention of chemists.

The theme of the session was "Chemistry-Key to Better Living".

ENCLOSURE

Due to the many requests from employees, as well as interested people, for copies of the brochure which was handed out on Family Day, the booklet will be found enclosed with each issue of this LOG.

KO211 YOUR ENGINEER

A graduate of M.I.T. and an M.S. in chemical engineering, Paul Netherwood was a textile chemist in the Arnold Print Works before he joined the Sprague Electric Company in 1942.

Mr. Netherwood's department, which is composed of chemists, physicists, mathematicians, electrical engineers, and technicians, is concerned with research and development. It is the function of this department to develop new products and improve old ones. They draw up specifications for small paper capacitors, Molded Tubulars, Prokors, Paper Tubulars, Metal Tubulars, and Mica. Here the directions are written to be followed in the manufacturing of these products. When a customer requests that a capacitor fulfill certain requirements, Mr. Netherwood and his group draw up the engineering specifications and general limitations necessary to carry out these requirements.

Also, when technical trouble occurs in production, it is their job to find what is wrong and the answers for its elimination. They make changes in specifications which keep our products out in front.

Mr. Netherwood is a member of the American Chemical Society and has a number of patents in his name and pending applications.

The Netherwood home on Grandview Drive in Wilton is a very busy place for Mr. and Mrs. Netherwood have three children. Paul is thirteen, Judith is eleven, and Jean is seven.

Playing golf and sailing are sports which Mr. Netherwood enjoys. He also gardens, and, recently, has been very busy painting and papering his home.

Another outside activity which takes up a great deal of his time is learning the Russian language. Although it is a very difficult language to learn, several people at Sprague Electric are studying it in order to be able to read Russian scientific journals. All in all, it makes for a very full program.

Weddings

On August 25, Miss Margaret Bruno, daughter of Mrs. Rose Mazzeotta and the late Charles Bruno, became the bride of Donald Albert Moulton, son of Mrs. Hazel Lillie and Roy Moulton, in the First Congregational church. The bride is employed in Wire Coating and the groom is employed in Check Inspection.

Miss Janis Marie Saulnier, daughter of Mr. and Mrs. William J. Saulnier, and Robert Anthony Harrington, son of Mr. and Mrs. John Harrington, were married on August 25 in St. Francis church. The groom is employed in Industrial Oil Stacking.

Miss Irene Sylvia Lanzillo, daughter of Mr. and Mrs. Felix Lanzillo, became the bride of Milan Francis Trimarchi, son of Mr. and Mrs. Rocco Trimarchi, on August 25, in Notre-Dame church.

The bride is employed in Miscellaneous Paper Finish and the groom is employed in Industrial Oil Stacking.

On September 4, Miss Natalie M. Garofano, daughter of Mr. and Mrs. James Garofano, and Donald D. Taylor, son of Mr. and Mrs. Hugh Taylor, were married in St. John Bosco church in Stamford. The bride is employed in the Network and Filter Development Section.

Miss Lila Joan Abraham, daughter of Mrs. Thomas Abraham and the late Mr. Abraham, became the bride of Ronald Clark, son of Mr. and Mrs. William Clark, on September 4 at St. Thomas church. The bride is employed in the Data Processing Department.

Miss Dorothy D'Arcangelo, daughter of Mr. and Mrs. Ralph D'Arcangelo, became the bride of Louis DePaoli, son of Mr. and Mrs. Anna DePaoli, on September 8 in St. Anthony's church. The bride is employed in the Network and Filter Development Section.

Births

S0N to Mr. and Mrs. Carl Vaughan on September 3. Mr. Vaughan is employed in General Maintenance and Mrs. Vaughan is employed in the Resistor Department.

DAUGHTER to Mr. and Mrs. Leonard Ankers on September 3. Mr. Ankers is employed in the Marshall Street Boiler Room.

DAUGHTER to Mr. and Mrs. Robert Blanchard on September 4. Mr. Blanchard is employed in Miscellaneous Dry Centrifugation and Sub Assembly. Mr. Blanchard is employed in Retail Sales.

DAUGHTER to Mr. and Mrs. Peter V. Mancuso on September 7. Mrs. Mancuso formerly was employed in PAA Soldering and Mr. Mancuso is the Chief Inspector at the Brown Street plant.

DAUGHTER to Mr. and Mrs. Harold Sharroon on September 10. Mr. Sharroon is employed in Bathtub Assembly, and Mr. Sharroon is employed in the Brown Street office.

SON to Mr. and Mrs. William Fortini on September 7. Mrs. Fortini was employed in the Can Shop.

DAUGHTER to Mr. and Mrs. Robert Ankers on September 11. Mrs. Ankers is employed in the Mica Department.
Sprague Electric products were displayed in television sets, radios, fluorescent ballasts, and other electrical equipment. Among the companies loaning material for the displays were Philco Corporation, General Electric Company, Stromberg-Carlson Company, Radio Corporation of America, Lear, Inc., Waterman Products Company, Delco Products Division of General Motors Corporation, and Sylvania Electric Products, Inc. The exhibition of these loaned products was a contributing factor to the enjoyment of the guests of Sprague Electric on Family Day.

Sid Chertok shows a display of capacitors to Mrs. Raymond Mahar, Ann Mahar, Judy Mahar, and Raymond Mahar.

The new cafeteria at Marshall Street was the scene of a great deal of activity on Family Day. Here, visitors relax and enjoy refreshments.

Sid Chertok shows a display of capacitors to Mrs. Raymond Mahar, Ann Mahar, Judy Mahar, and Raymond Mahar.

Clarence C. Chaffee welcomes the first guests at the Brown Street plant, Mr. and Mrs. Wayne Wright.

Hymen Patashnick, of the Drury High School faculty, was a visitor at the Beaver Street plant on Family Day.

Above: From left to right: Mr. R. C. Sprague, Tom Cullen, Mrs. Rita Cullen, Barbara Cullen, Mrs. Eileen Trottier, Kathy Trottier, Judy Collins, and Madeline Long. Mr. Sprague explains a process in the F.P. Assembly to his interested audience. Frank Segala operates the machine.

Above: Pfc. James Heddens holds a conversation over a Walkie-Talkie with Louis R. Larson, Jr., Margaret and Francis Bissaillon watch.

Right: A Sprague Electric employee demonstrates her work for the benefit of a group of friends.
Token Force at Work for Benefit of Guests

Left: An employee in the Dry Rolling Department runs her machine for a group of visitors. The Brown and Beaver Street plants were open for inspection in the morning, and the Marshall Street plant received guests during the afternoon.

Above: Members of the KVA Department pose proudly with their fine display of capacitors.

Right: The new cafeteria at Marshall Street was used for the first time on Family Day. Refreshments were served during the afternoon to the guests. Mr. and Mrs. Robert Washburn supervise the soda-pop consumption of their daughter.

Above: Blanche Tatro of Miscellaneous Resistor Assembly explains her work for the benefit of an interested group of spectators.

Left: Betty Burdick and Mary Gordon pass out souvenir brochures to the guests as they enter the Brown Street plant. As the guests left the plant, they received pocket-sized cups as a memento of the occasion.

John Davis of the Filter Department arranged this attractive display of filters.

Nancy Puppolo, one of the guides at Brown Street during Family Day, shows an exhibit to Mr. and Mrs. Victor Boucher and their son, Bruce.

Bathtub Assembly had many guests while it was open for inspection. Pete Grande explains a process in the department.

Ernie Purpura explains the part the Drafting Department plays in production at Sprague Electric.
Network and Filter Development Section
by Julia Descrois

LORRANE BENNETT celebrated her birthday on September 10.

DAVID REED is enjoying his vacation.

We all wish DOROTHY D'ARCANGELO and Louis De Paul the best of luck. They were married on September 26.

Our foreman, FRED SCARBOROUGH, enjoyed a week of vacation.

BETTIE MARSH will be going sailing if her husband gets that new boat he wants.

Retail Sales
by Hit N'Run

ALICE MALLOY and FLORENCE RICHARDS came back from their vacations rested and glowing with their suntans. BEA CAMPEDELLI also is back from her very enjoyable trip to Florida.

We are sorry to have HELEN MORAWIEC leave us. We'll miss you very much, Helen, and we hope you have great success in your new job. Another to leave us is JEAN MAHONEY. We will certainly miss her but know that she will be happy in her new position.

EMMA TADDEILO and her husband celebrated their sixteenth wedding anniversary on August 23. Congratulations to Mr. and Mrs. Taddei. MARIO MAGNANI made a trip to Canada over the Labor Day weekend.

HARRY PICKWELL recently spent a week end in New Jersey visiting his parents. He spent the week quite delighted with the television there. They can get eleven channels.

Maintenance
by Audra Bowen

A farewell party for DOROTHY BUZZELL was held by RAY LAMPAHUR, AUDRA BOWEN, and JOHN WHITNEY. The five girls from the Test Department were invited to share the chocolate cake and join in the toast made by the Captain. MRS. BUZZELL is moving to the Test Department. Good luck, Dot. We will miss you.

We extend a warm welcome to JOHAN WHITNEY who replaces DOT BUZZELL in B.S. SCHULZEN's office.

On August 18, Miss Irene Burke became the bride of MAURICE LAFOND who is employed in the Test Department. Their wedding included visits to Boston, New Hampshire, and Maine.

On August 23, Miss Ruth Rarick was married to ARTHUR REYNOLDS in St. Francis church. After a honeymoon in Niagara Falls, New York, they are residing in Poulsbo, Vermont. Arthur is employed in the Plumbing Department.

Did you know that AUDRA BOWEN is leading a double life these days? She peeked into her kitchen at night and revealed she is spending her evenings caging vegetables. Her vegetable garden is yielding a vast amount of vegetables for caging and she will soon be in the throes of making grape juice from the fruit of her small vineyard. Well, that is one sure way of heating the high cost of living, processing and storing from one's own garden. Nothing like the good life in Vermont — they say.

We wish to extend our deepest sympathy to MARGIE ROHREN and her family on the sudden loss of his wife.

Test Equipment Engineering
by E.B. Ryan

Recently interviewed about his vacation, JACK FABRICIUS, who is in charge of Test Equipment, reports that it was spent mostly working on the new building he is building in Stamford, Vermont. Jack, who spends all of his leisure time working on his home, proudly showed me the blue prints, which were drawn to his own specifications, and then endeavored to explain time and time again how he had arrived at this conclusion. Even to our inexperienced eyes, it was easily seen that the eight-room house largely was made by his own hands. It is built of glass walls, is worthy of its magnificent location. It is so designed, carefully planned and adapted to its site as to obtain the maximum benefit of the seasonal light and heat rays of the sun. Concrete has been poured, the retaining wall and the masonry were laid and Jack is looking forward to the next step in his work of building. Without a doubt, this house will be a much admired feature of the modern mood and will reflect, in its own wonderful way, the exacting tempos of successful American living.

Congratulations to MR. and MRS. RAYMOND LUSCIA who celebrated their third wedding anniversary this month by vacationing in Providence, Rhode Island and Poughkeepsie, New York. May this be the first of many successful milestones you will pass on life's highway.

The welcome mat has been set out in front of our newest addition, MAURICE LA FOND who has been transferred to the Test Department. Trust you will like being with us, Maurice, and accept our hearty congratulations on your recent marriage. Our best wishes to you both.

MARY CANTONI's realistic panto- mine of her recent trip to Coney Island where she visited the wax museum and saw many other things, has enlivened many a meeting. Mary and her family also visited relatives in West Orange, New Jersey.

The girls of Electric Test were guests at the farewell dinner party held at the Springvale Hotel, supervised by the Captain, MRS. RAYMOND BUZZELL, of the Maintenance Office who resigned recently. AUDRA BOWEN and MRS. MARY CANTONI were co-chairman of the dinner and Mrs. Bowen served as a capable toastmistress. Mrs. Buzzell was presented with a feather fan containing an original poem written for the occasion and suitably autographed by everyone present as a memento of the party. Later, group pictures taken will be added to the folder to remind Dot of her many years here and make sure we know how much we shall miss her.

Ceramics
by Ida Gigliotti

Our supervisor, CLYDE KING, is leaving us. We wish him good luck.

All of us in Ceramics want to wish OLIVER LATHROP of the Dupont Department the best of luck. Oliver is going to attend Harvard.

The "Alouette" quartet of the Ceramic Department is going into its final rehearsal and wishes to notify all its friends of its coming appearance on the TV Teen-Age Barn. The quartet consists of IDA GIGLIOTTI, ANNI LITTLE, CLARA BOURDIN, and ALMA HALEY.

A sincere welcome is extended to ROBERT NAGLE who joined our department as a new check inspector, and to JOHN MURACHI, VICTOR VARESCI, and THOMAS DUNN. We hope you will like it here with us.

ARTHUR MORRIS has enjoyed his vacation.

GERRY COYNE is enjoying a week end in Boston.

Happy birthday to VIRGINIA GREGORY who celebrated on August 30.

CLARA BOURDIN has moved into her new home and is very happy there.

PAP ROWE is hoping they will manufacture tires which will be blow out proof. It seems he has been having a siege of flat tires lately.

STANLEY LESNICK enjoyed his vacation in spite of his frustrated desires for a cold dip in the icy sea. It seems Stanley was filled with anticipation for a swim on his arrival at the beach, but had to wait sometime for a locker. When he finally had changed into his swim suit and had gotten as far as the edge of the ocean, the rains came. Stanley's enthusiasm was dampened. But that was only his first day, he fine weather after that and feels a whole lot better now.

Shipping Department
by Celn Trueide

DICK TROTHER spent his vacation at Lake George, New York, and was there during the annual vacation.

CLARA BOURDIN went to Lake Moosehead in Maine.

RENA MECZYWOR moved into a new home and is very happy there.

FREDERICK GROGAN, ANTHONY SALMATARTINI, and GERRY SULLIVAN spent a week end at Lake Champlain, New York.

WILLIAM GROGAN and NAJII DAVIS attended a dinner meeting of the Benevolent Association at Great Barrington recently.

Exhibits in Cafeteria Attract Many Spectators

From left to right: Michael Cano, Mary Cano, and Natalie Cano find out what a capa- toor does. Bob Peters does the explaining.

Right: The Walkie-Talkie exhibit was a popular point of interest. From left to right: Mrs. John Southworth, John South- worth, Bob Peters, and Sid Cherkot learn how to use it from Pfc. James Heddens.

**For the Women**

"Mirror, Mirror, On the Wall Who Is Fairest of Them All?"

by Mary Ann Gordon

Ah me, if we only had a magic mirror to answer back. "Are you fairest of them all?", but it isn’t as simple as that. Beauty is as beauty does, and New England is more obvious than the correct application of makeup. In this age of industrial perfection, hundreds of technicians and chemical analysts in great laboratories are constantly bringing out products which will enhance the beauty of women, but the finest cosmetics in the world will not do the best for you, unless you know how to use them.

Barbara Ann Scott, Olympic figure skating champion, is a refreshing natural beauty with clear skin, lovely blue eyes and fair hair. Her makeup routine is a simple one, which any woman can follow with a minimum of time and expenditure. The result is makeup which enhances one’s best features without obtruding anything which is never obvious.

**PACKAGES FOR KOREA**

Although many families have had plenty of experience with mailing food to the boys in the armed Forces, few would care to possess as authorities on the subject of just how to about things so various may have to be considered in each case. However, there are a few sound rules, and perhaps you will find it useful to look for you to mail "goodies" with most confidence, regardless of distance.

1. Choose recipes that travel well and stay fresh for a relatively long time.
2. Many persons know, from experience during World War II, that overseas packages particularly are often held under unsanitary conditions. If your cookies are too rich, they are likely to be burnt or turned rancid. Must sheet cookies cut into bars, and, flat, most individual cookies are the best bets. Cookies flavored with honey and fruit improve with age.
3. Watch your inside wrapping and packing. Moist-proof cellulose is one of the best interior wrappings to prevent drying out of most cookies. It also keeps paper-based cookies from absorbing oils from cooked goods.
4. In applying your lipstick, remember that red is the strongest color in the spectrum and that it fairly well covers the center of the lips, then blend out the edges. Take larger pieces of the lipstick to moisten the entire lip and then blend it in the leather of the lips or on the warm side of the face. Use a little powdered face paint that says "This parcel may be opened for postal inspection." These labels can be bought at any 5¢ & 10¢ store. Put one label on the top of the package and another near the bottom. Print or type the name and address of the person to whom you are mailing the package, and on both the labels and on the wrapper itself, so that if the labels should come off, leaving a sticky pavement, there will still be available. Tie the package securely with several rounds of string, and, if possible, put a stick of hard soap on top of the package.
5. Mail the package as soon as it is wrapped and put in the decker during its trip, especially if it is going overseas, but you will have your chops on the decker, and, after the war is over, you can find a place to take your chops where you want to. Attach a removable wooden handle to the twine for carrying to the post-office.

**FALL FASHIONS**

by Mary Ann Gordon

Here comes September, with a new season, new fabrics, and smart new fashions to give those fashions added appeal. Color is the key word in fashions these days. It’s the fabric that excites the eye, the fabric that makes you and your clothes look better. There is a new rayon day fabric this year, with a clever inside wrapping that looks really exciting.

Rayon duvetin, that beautiful used fabric, looks extra smart this fall for some reason. And there are those new, soft, velvety day tissues for even the most fastidious. With its soft and velvety surface, it has a very feminine appeal, and it’s a lot softer than anything else you can buy. And despite the velvety surface of this colorful fabric, it wears beautifully. And despite the velvety surface, it looks just like wool jersey. Look for it in dainty blouse styles and for real wearing comfort. It is a hand-woven handloom which has no digestion to show marking.

The textured look appears again in the fall collection, and your name Soft and warm on the napped outer surface, it looks just like wool. But here the velvet is smooth and firm against the skin, for real wearing comfort. Look for it in halter blouses, for example. This handsome new fabric, made in Avisco rayon with a touch of nylon, is one of the most successful in the fabric the fall season. And another on the scene is an extra-smooth, an extra-light, an extra-cool fabric, and the longer it wears, the cooler it is in the heat. And the longer it wears, the cooler it is in the heat. And the longer it wears, the cooler it is in the heat.

**High School Football**

Drury and Adams got off the season with decisive wins over Northampton and Turners Falls respectively.

Drury whipped Northampton, 20-7, and played a spirited brand of ball for so early in the season. Taking advantage of the mistakes by her opponents, the Blue Devils scored twice in the first half and four more at the intermission. Drury sailed again in the third quarter to pile up a 28-0 lead. Northampton fought hard and was rewarded with a late fourth period score.

Bob looked very good in the quarterback slot and Durant made two fine field goals for Drury. Adams High, led by Chet Bury, at South Hadley, lost in the leading play-off game over the Kiwanis. What an exciting ballgame it was. The atmosphere of World Series play, and the spine-tingling action was a thrill to the home team and to the visitors. The Kiwanis Team lost. Sportmanship was seen throughout, and pandemonium reign when the final gun. Adams then took on Morgan and had all of the youngsters who have and had and will have on their team, put in as many as possible. And all of the youngsters who have

The Little jacket above covering a deerskin, side-banded dress, is ideal for the Indian Summer days ahead and comes in Simplicity Designer’s Pattern 5215, size 20.

**Little League**

Hall the "changes." The Rotary Club of the local Little League captured the leading play-off game over the Kiwanis.

What an exciting ballgame it was. The atmosphere of World Series play, and the spine-tingling action was a thrill to the home team and to the visitors. The Kiwanis Team lost. Sportmanship was seen throughout, and pandemonium reigned when the final gun. Adams then took on Morgan and had all of the youngsters who have and had and will have on their team, put in as many as possible. And all of the youngsters who have

Two of the sponsors of the Rotary Team, and on the extreme right is George Gouame, Coach of the Rotary Team.

**High School Football**

Drury and Adams got off the season with decisive wins over Northampton and Turners Falls respectively.

Drury whipped Northampton, 20-7, and played a spirited brand of ball for so early in the season. Taking advantage of the mistakes by her opponents, the Blue Devils scored twice in the first half and four more at the intermission. Drury sailed again in the third quarter to pile up a 28-0 lead. Northampton fought hard and was rewarded with a late fourth period score.

Bob looked very good in the quarterback slot and Durant made two fine field goals for Drury. Adams High, led by Chet Bury, at South Hadley, lost in the leading play-off game over the Kiwanis.
